### WORK EXPERIENCE

8/2019 TO 5/2020

#### Web Developer at Dorsey Tire Co

Worked with department managers to design and create web apps that would assist with day-to-day operations the business.

- Created an inventory and notification utility to track expensive equipment and notify responsible parties of calibration due dates. Built custom table and wizard-style form with React.js for displaying and collecting data. Node.js and MongoDB backend.
- Created and managed several Excel spreadsheets that automated financial receipts and recurring monthly bills

05/2019 TO 2021

#### Creator at eBridge Club

Personal Project still in active development. A user-friendly bridge website for ex-Pogo.com players to play free online multiplayer contract bridge.

- Leverages Next.js for React server-side rendering and Redux for handling game and site-wide state.
- Build on an express server backend that utilizes both RESTful and socket patterns to support real-time chat and game events.
- CSS in JS through Styled Components with a custom theme component for uniform styling across the app.

1/2012 TO 1/2018

#### Graphic Designer at Freelance

Created promotional materials for local non-profits and businesses.

- Taught myself tools such as Adobe Illustrator and Adobe Photoshop.

### EDUCATION

2019-02-01 TO 2019-08-01

#### Georgia Institute of Technology

- Bootcamp: *Fullstack Web Development (4.0)*
